Comments:

We just renewed for our second year with Cartvertising. There are so many things we love about it - its money well spent. As the exclusive referral for massage in our area cart branding gets our name out there like nothing else can. Everything about the process was so easy. The art department did a great job giving us a professional look. We made a few alterations this year and everything was done as promised, and right on point. People come- that's what it's all about. Our long time clients tell us they see us on the carts. We have a new client almost every day and even though they rarely mention the carts specifically, I know it's from the newfound recognition we have at the store. New clients did not come in volume like this before we started branding in Vons. We are pleased with the professional service we receive from your company. Our business is growing. Branding has made us Legitimate. Our name is now well known and well received in our community.
