Comments:

I am a relatively new business owner and using the receipt tape ads through IndoorMedia has been a great way to help get my name out there and bring in new business. I even had someone from out of state give me a call when they were moving in because they were sent a receipt from their parents for a gift card that had my ad on it. And working with Tony and RTUI has been great. They are pleasantly persistent when following up and not pushy. They have also helped with feedback to see if I needed to make updates as well as follow up at the store to make sure it was running properly. This is definitely a great way to do some local marketing that makes a difference. I would recommend anyone to give it a try.
